AMERICA IS IN CRISIS. TOGETHER WE CAN MAKE A DIFFERENCE!

Beds are needed for triage, patient care and first responder staff quarters to combat COVID-19’s spread across the country. Yet another crisis is ongoing; lack of supportive and affordable housing. Modular Supplemental Care Units address both, but we need your help to make this thoughtfully designed, future-focused solution a reality.

THE MODULAR SOLUTION IS A 3X ROI: CRISIS RESPONSE / PERMANENT HOUSING / COMMUNITY BENEFIT

The Modular Mobilization Coalition (MMC) has brought together 20 small businesses, equating to 30 factories and 5,000+ hardworking men and women across our nation to build a standardized modular Supplemental Care Unit. The SCUs serve a dual-purpose use: basic care rooms now and multi-family permanent and supportive housing later; all while putting Americans back to work! With your support, we can get ahead of the crisis and provide new opportunities for communities to rebuild.

GETTING AMERICANS BACK TO WORK

TOGETHER WE ARE STRONGER
SPONSORING SHELTERS FOR AMERICANS IN NEED

Your support allows MMC to reduce costs and produce more units for the areas that need them most, both now during the crisis and, later as permanent housing for Veterans, seniors and working families. Our coalition of 30 factories (which is growing daily), will recognize and appreciate your support as a preferred vendor.

With your support, MMC will immediately mobilize to construct a total of 5 SCU projects, equaling 100 patient care rooms. The goal of this initiative is to locate these five projects around the nation, whether in your local community or wherever the need is greatest. Funding to construct each project is $500,000, for a total goal of $2.5 Million. Help MMC address the immediate needs of patients, healthcare workers and first responders; provide supportive and affordable housing to seniors, Veterans and working families; and put Americans back to work. Your support will change lives!

SPONSORSHIP BENEFITS
